3103A Rotating Handle Alloy Secateurs

Features fatigue-reducing lower rotating handle.

Upper Blade superior Japanese SK5 steel, heat-treated, precision-ground (replaceable).

Lower Blade high-carbon S50C steel. Resin spill groove. Chrome-plated finish.

Overall Size & Weight 215mm; 294gms.

Effective Opening & Cutting adjustable 30≈47mm; 15≈23mm.

Body & Handle drop-forged alloy body and handles, with PVC grips. Balanced rotating lower handle. Two position locking lever.

Replacement Parts top blade, spring, pivot bolt assembly, buffer.

3103A-4 Forward-Cutting Alloy Secateurs

Features forward-cutting design for vine work – similar to leading European brands.

Upper Blade superior Japanese SK5 steel, heat-treated, precision-ground (replaceable).

Lower Blade high-carbon S50C steel. Resin spill groove. Chrome-plated finish.

Overall Size & Weight 215mm; 250gms.

Effective Opening & Cutting adjustable 30≈47mm; 15≈23mm.

Body & Handle drop-forged alloy body and handles, with PVC grips. Two position locking lever.

Replacement Parts top blade, spring, pivot bolt assembly, buffer.

3169A-1 PVC Heavy-Duty Alloy Secateurs

Features heavy-duty, ergonomic design. PVC dipped handles.

Upper Blade superior Japanese SK5 steel. Heat-treated, precision-ground, non-stick black finish (replaceable).

Lower Blade high-carbon S50C steel. Resin spill groove. Chrome-plated finish.

Overall Size & Weight 215mm, 250gms (small);

Effective Opening & Cutting 45mm / 20mm (small);

Body & Handle drop-forged alloy body and ergonomic handles. Steel locking pin.

Replacement Parts top blade, spring, pivot bolt assembly, buffer.

3170-1 Thumb-Lock Alloy Secateurs

Features squeeze to release thumb-lock latch. Lightweight mid-size design.

Upper Blade superior Japanese SK5 steel, heat-treated, precision-ground (replaceable).

Lower Blade high-carbon S50C steel. Resin spill groove. Chrome-plated finish.

Overall Size & Weight 205mm; 198gms.

Effective Opening & Cutting 47mm; 23mm.

Body & Handle drop-forged alloy body and handles, with PVC grips. Thumb-latch lock.

Replacement Parts top blade, spring, pivot bolt assembly, buffer.

PILJV8-GS Grafting Shears
*indent orders only

Features professional grafting shears with extended razor knife blade. Ideal for mass production grafting.

Upper Blade precision honed, razor finish, hi-carbon steel, chrome-plated. Blade cutting length 55mm.

Lower Blade drop-forged cast steel, precision ground, chrome plated.

Overall Size & Weight 190mm; 210gms.

Effective Opening & Cutting 28mm, 5-20mm living wood.

Body & Handle cast steel handles, PVC coated grip. Rear handle heavy-duty safety lock.

Replacement Parts top blade, spring.

PILJ60-GT All'n1 Grafting Multi Tool *indent orders only

Features multi-function cut and slice blades. Ideal for grafting of tree lines. Angle cut, dice, slice, wedge, split, trim and cut.

Upper Blade two precision, hi-carbon steel blades, 45mm.

Lower Blade two precision, hi-carbon steel blades, 60mm.

Overall Size & Weight 240mm; 362gms.

Effective Opening & Cutting 40mm; 10≈15mm.

Body & Handle drop-forged cast aluminium, PVC grip. Thumb safety lock.

Replacement Parts spare blades, spring, pivot bolt assembly.

3505S-/SS Stainless Steel Fruit Picking Snips

Features lightweight and durable.

Upper Blade precision-ground 420 knife grade stainless steel.

Lower Blade 'serrated' precision-ground 420 knife grade stainless steel.

Overall Size, Blade Length & Weight 185mm; 45mm (blade length); 116gms.

Effective Opening & Cutting 40mm / 10mm living wood.

Body & Handle Adjustable Screw, solid steel centre pivot bush. Pressed H.T. Steel handles. PVC Dipped. Safety Lock and Anti-Drop finger hold.

Replacement Parts spring, safety lock & finger hold.

7118 ByPass Mini Loppers Spur and Male-cluster pruner

Features designed for high speed close-proximity use, when secateurs are not strong enough.

Upper Blade precision-ground Japanese SK5 steel, razor edge sharpened.

Lower Blade serrated grip, mid-carbon S55C, precision-ground. Hardened & tempered. Hard chrome-plated.

Overall Size & Weight 400mm; 495gms.

Effective Opening & Cutting 45mm; cuts 5≈20mm living wood.

Body & Handle Oval heat treated 6061-T4 aluminium fluted tubing with comfort grips.

Replacement Parts top blade, buffers.

PIL705-1NYL Nylon Handle Secateurs.

Features improved fibre glass reinforced polymer handles with finger grips.

Upper Blade superior Japanese SK5 steel, heat-treated, precision-ground (replaceable).

Lower Blade high-carbon S50C steel. Resin spill groove. Heat-treated finish.

Overall Size & Weight 210mm, 237gms (small)

Effective Opening & Cutting 45mm / 20mm (small).

Body & Handle molded from fibreglass reinforced polymer, molded finger grips for better grip. Steel locking pin.

Replacement Parts top blade, spring, pivot bolt assembly, buffer.

3750-1 BP Sure-Grip Secateurs TRP 'Sure-Grip' Inserts

Features economical, professional, heavy-duty precision pruning.

Upper Blade precision-ground SK5 steel, razor edge sharpen. Teflon coated. Resin taper.

Lower Blade precision-ground mid-carbon steel, heat-treated to S50C. Hard chrome-plated.

Overall Size & Weight 203mm; 188gms.

Effective Opening & Cutting 45mm; 25mm living wood.

Body & Handle medium sized, glass reinforced nylon handle with TRP non-slip SOFT-GRIP inserts.

Replacement Parts top blade, compression spring, pivot bolt assembly, buffer.

3103A-6 Heavy-Duty Anvil Secateurs

Features forward cutting design with an anvil blade system.

Upper Blade superior Japanese SK5 steel. Heat-treated, precision-ground (replaceable).

Lower Blade heat-treated duralumin anvil block.

Overall Size & Weight 210mm; 225gms.

Effective Opening & Cutting 45mm; 20mm. Parallelogram cantilever action.

Body & Handle drop-forged alloy body and handles with PVC grips. Thumb activated locking lever.

Replacement Parts top blade, spring, pivot bolt assembly, buffer.

3312-BP Mini Secateurs

Features professional and precision pruning, ideal for small hands.

Upper Blade precision-ground hi-carbon steel, razor edge sharpen. Hard chrome-plated.

Lower Blade mid-carbon steel, heat-treated to S50C. Hard chrome-plated.

Overall Size & Weight 180mm; 136gms.

Effective Opening & Cutting 40mm; 16-20mm living wood.

Body & Handle small sized, plastic molded handle with ergonomic fit. Thumb operated safety lock.

Replacement Parts compression spring, buffer.

7116 ByPass Heavy-Duty Loppers 600 & 750mm Lengths

Features exceptional strength, close proximity lopping design, low bark damage.

Upper Blade precision-ground Japanese SK5 steel.

Lower Blade drop-forged, mid-carbon, heat-treated S50C steel with resin groove.

Overall Size & Weight 600mm, 1.050kg or 750mm, 1.057kg.

Effective Opening Width 55mm max. Cuts 40mm living wood.

Body & Handle oval tubular heat-treated 6061-T4 alloy with comfort grips.

Replacement Parts top blade, lower blade, pivot bolt assembly, buffers, blade attach bolt set.

PILJH1163P-60 Medium Duty Professional Lopper

Features exceptional strength, lightweight precision lopper, designed for heavy-duty professional operation.

Upper Blade drop-forged, precision-ground SK5 steel, razor edge sharpened.

Lower Blade drop-forged, mid-carbon S55C, with resin spill.

Overall Size & Weight 600mm, 905gms. Cuts 30mm max living wood.

Body & Handle oval heat treated 6061-T4 aluminium tubing with comfort grips. Forged alloy connecting lugs, bolted.

Replacement Parts top blade, lower blade, pivot bolt assembly, buffers, nuts & bolts.

PILJH1160-60 ByPass Professional Loppers

Features lightweight precision lopper designed for fast operation [similar to P-14/16].

Upper Blade precision-ground Japanese SK5 steel, razor edge sharpened.

Lower Blade precision stamped and ground mid-carbon steel, heat-treated to S50C, with resin groove.

Overall Size & Weight 600mm, 920gms. Cuts 35mm living wood.

Body & Handle oval heat treated 'bright' hi-tensile steel tubing with comfort grips.

Replacement Parts top blade, pivot bolt assembly, buffers, bolt set.

9565-1 Folding Saw; 9575A Pruning Saw with Scabbard

Features super fast pruning saw. Available in either folding blade design, or fixed blade with scabbard cover including belt-hold for convenience and portability.

Saw Blade S55 high carbon steel, **triple-ground cutting teeth**. Rolled back-taper for reduced sticking.

Overall and Blade Size Folding Saw: 180mm (blade length); Fixed Saw: 420mm, 270mm (blade length).

Body & Handle durable reinforced ABS polymers. Non-slip, TRP soft-grip handle insert.

PILK-05 3'n1 Professional Blade Sharpener Tool

Features a carbide steel sharp-edge and guide plate for easy, convenient sharpening. Ergonomic hand fit.

Ideal for storing in a pocket or Apron Bag.

Includes lubricating oil bottle and oiling felt, conveniently housed within the handle.
